

CDR-Life is a young and innovative biotech company based in Schlieren where we create novel antibody therapies against incurable cancers and eye diseases. It is a dynamic company with an ambitious team having a strong scientific focus and a highly collaborative approach.

Our research and development (R&D) activities and know-how make up the foundation for the novel medicine candidates in our portfolio. The smooth operation of these R&D activities is critical to the successful development of new valuable medicines for people with life- and sight-threatening diseases.

To ensure the optimal operations of our R&D activities, we are looking for a highly motivated and collaborative individual with a desire to manage our central laboratory operations.

Lab Manager (60-100%)

Responsible for efficient operations of our biotech R&D laboratories

The successful candidate will be responsible for centralized operational activities required to support R&D. The role is a central function in the company, is key for the R&D activities, and covers a diverse set of tasks containing both organizational and laboratory work. The role requires a service- and solution-oriented mindset, a wish to interact with many different people, and a drive to get things done.

Main responsibilities

Materials

- Purchase standard laboratory consumables and negotiate with suppliers
- Manage and monitor consumable stocks
- Maintain inventory records of general chemicals and consumables
- Organize shipments of materials and samples
- Receive parcels and deliveries

Media kitchen

- Ensure glassware cleaning, autoclaving
- Monitor and prepare standard solutions (e.g. buffers)
- Support standard laboratory work as time allows

Facility

- Organize facility installations
- Manage maintenance of equipment in collaboration with responsible person
- Order/organize laboratory and office furniture
- Manage laboratory working space and introduction for new staff

Your Profile

- Apprenticeship education (laboratory technician) in life science discipline
- Min. 5 years of experience in life science laboratory setting (pharma, biotech, or academia)
- Strong organizational and communication skills
- Service-oriented mindset and an ease to work effectively with colleagues
- Fluency in written and spoken English and German
