

CDR-Life is a young and innovative biotech company based in Horgen, Zurich where we develop novel immunotherapies against cancer based on our unique tumor targeting technology. It is a dynamic mission-driven company with a highly collaborative approach. To offer a broad insight into the different groups and to ensure the optimal operations of our R&D activities we are looking for a motivated:

## Scientific Intern and Lab Support (100% - for 12 months)

We are offering an exciting, hands-on internship for a motivated student eager to gain practical experience in a dynamic R&D environment. As a Scientific Intern and Lab Support at CDR-Life, you will contribute to both research activities and laboratory operations by performing a variety of technical and administrative tasks that ensure smooth and efficient lab workflows. This is a great opportunity to gain insight into different stages of immunotherapy research and development while working in a collaborative setting. The role is ideal for someone with a service-oriented mindset, a proactive attitude, and the flexibility to adapt to evolving project needs. The proposed starting date of the internship is **April 2026 or upon agreement**.

### Key Responsibilities

#### Scientific

- Receive a comprehensive introduction to our core scientific teams, including Discovery, Developability, Pharmacology, Upstream & Downstream Processing, Drug Substance, and Analytics
- Support research and development activities within these groups through short- to mid-term rotations (several weeks to months per group)
- Progressively develop skills and independence across various process steps, ultimately contributing to a semi-independent project under the guidance of experienced scientists

#### Lab Support

- Assist with routine laboratory maintenance, including cleaning glassware and operating autoclaves to ensure a sterile and organized work environment
- Prepare standard solutions (e.g., buffers, media, etc.) according to established procedures
- Manage incoming parcels and deliveries, ensuring proper handling and storage of lab materials and reagents

### Who you are

- Bachelor's degree (or currently pursuing one) in Biochemistry, Chemistry, Biology, or a related scientific discipline
- Initial hands-on experience in a laboratory setting, whether through coursework, internships, or academic projects
- Familiarity with standard laboratory techniques, including pipetting, aseptic techniques, and proper scientific documentation
- Strong interest in a diverse, cross-functional internship experience, with exposure to multiple scientific teams rather than a narrow specialization
- Demonstrated eagerness to learn, with the ability to quickly grasp new concepts and workflows
- Reliable, proactive, and positive work ethic; even when performing routine or repetitive tasks such as autoclaving or glassware cleaning

### **Why CDR-Life?**

Become part of a team on a mission with a collaborative, open, and solution-oriented spirit where you can have an impact. Enjoy exciting opportunities for development and professional growth within our growing organization with flexibility that fits with your needs and lifestyle.

To apply or in case of questions, please contact [anja.duss@cdr-life.com](mailto:anja.duss@cdr-life.com). We are looking forward to hearing from you.
